

## *A TALE OF STORE GAMERS*

Kev and myself have decided to organise a tale of store gamers that will take place over the next few months. The tale should provide a good way to build, paint and game with a new army (or one you want to get finished). The tale will work by setting out a number of tasks to be completed over a month – some examples are listed below. To make it more interesting, there will be an additional task each month like making objective markers or writing a background story. There will also be a mini league run along side with points for completing the tasks on time and for any games that you play. There may even be a prize at the end. This will obviously take a number of months to complete, only sign up if you think you can see it through.

### TASKS

Tasks will generally involve getting a section of an army ready. This will take the form of x number of unit types to be completed. Each month, there will be a number of units that you should aim to get finished by the end of that month. After a few months, everyone taking part should have a complete painted army. The first month will provide you with the foundations of your army.

**For the first month:** (Models to be finished by Tuesday 17<sup>th</sup> of February)

**40K:** One HQ and two Troop choices.

**Fantasy:** One hero and two core choices.

**Bonus:** A background story for your army.

You may start straight away, the first month is longer to give time to find a paint scheme and decide what direction you want your army to head in.

Further month tasks will follow nearer the time.

### POINTS

As mentioned above, completing tasks in the given time will provide points and hopefully provide further incentive to get things finished and play a few games.

#### Painting

Models painted on time 5pts

Models painted late (or mostly painted) 3pts

Models not painted 0pts

#### Games played with your tale army (best result)

Win 5pts

Draw 3pts

Lost 1pt

#### Bonus

Objective marker, army background etc. 2pts

Also, Kev is keen to pop up a painting log thread on Warseer for all of us that we can update as and when.
